

Workshop outline · BE01 · Energy, Water and Natural Resources

Energy Without Compromise.

Does your organization know what renewable energy requires, and whether your current approach qualifies? A live session on Future-Fit Break-Even Goal BE01: what the standard requires, where your organization stands, and what to do next.

For

Operations directors, facilities managers, engineering leads and sustainability managers. Also manufacturing, supply chain and environmental teams, and the finance partners who own resource cost. No prior knowledge of the Benchmark is needed.

Format

Two hours forty-five minutes. Live virtual.

What it is for.

Most organizations have made some commitment to renewable energy. Few have applied a rigorous standard to what renewable means in practice, or know how far they are from meeting it.

The standard is Future-Fit Break-Even Goal BE01, "Energy is from renewable sources". In the words of the Benchmark: "A Future-Fit Business ensures that all the energy it consumes – as electricity, heat or fuel – is derived from renewable energy sources: solar, wind, ocean, hydropower, geothermal resources, and biomass." The session shows what that requires, how progress is measured on the scale from 0 to 100 percent, and what your team has to do to find out where the organization stands.

It is not a complete benchmarking exercise. A real progress score needs data from every site, and more time than one session allows. Participants leave knowing exactly how to do it.

The Future-Fit Business Benchmark is published by the Future-Fit Foundation under a Creative Commons Attribution-ShareAlike 4.0 license. Goal statements are quoted from Release 2.2. Lorne Cousins is a Future-Fit Accredited Advisor.

What you leave with.

- A precise understanding of what BE01 requires, and why the standard is higher than most organizations meet today
- The ability to tell which approaches count under the Benchmark and which do not
- A worked example of the progress score calculation
- A Fitness Snapshot: a directional estimate of where your organization stands on the scale from 0 to 100 percent
- A Game Plan: the questions to ask, the data to gather and the conversations to have, so that real benchmarking can follow
- A Personal Action Plan: three named, time-bound actions
- After the session: a 30-day follow-up pack of four weekly activities
- After the session: the Future-Fit Action Guide for BE01 and a reading list

Why it matters.

- Carbon pricing is tightening, energy claims are scrutinized for greenwashing, and fossil fuel prices stay volatile
- The impacts are measurable and the business case is clear
- It is the most tangible place to start for an organization new to Future-Fit

Format.

Length	Two hours forty-five minutes
Mode	Live virtual
For	Operations directors, facilities managers, engineering leads and sustainability managers. Also manufacturing, supply chain and environmental teams, and the finance partners who own resource cost. No prior knowledge of the Benchmark is needed.
Method	Short inputs from Lorne on the goal and the standard; A worked example of the progress score; The Fitness Snapshot, done on your own organization; The Game Plan and the Personal Action Plan, written in the session

Your speaker.
